

## Graph $y = \tan\left(\frac{x}{4}\right)$

$a=1$   $d=0$   $c=0$   $b=\frac{1}{4}$

Start:  $\frac{c}{b} - \frac{\pi}{2b} = -2\pi$

End:  $\frac{c}{b} + \frac{\pi}{2b} = 2\pi$

x	y
$-\pi$	-1
0	0
$\pi$	1

## Graph $y = \csc x$

## Cosecant Graph

## Graph $y = \sec x$
